Digital Map Products CEO to Present at the 2013 Location Intelligence Conference

(Irvine, CA – May 15, 2013) Digital Map Products (DMP), a leading provider of cloud-based spatial technology solutions, today announced that its President and CEO, Jim Skurzynski, will be presenting at the 2013 Location Intelligence Conference. This innovative conference, which brings together leaders in the location and mapping industry, will take place on May 21st in Washington D.C.

In his presentation, Mr. Skurzynski will discuss the mainstreaming of spatial technology and the broad applications for using location in everyday business, government and consumer tasks. He will share how cloud computing has transformed the GIS industry and is creating new rules for success and tremendous opportunity. Drawing on his more than a decade of experience developing innovative web mapping applications, Jim Skurzynski will outline what lies ahead for cloud-based mapping and how companies can best capitalize on this GIS revolution.

Digital Map Products is transforming the spatial technology industry by making mapping easy to implement and use, putting this powerful technology in the hands of end users. The company's solutions cover the spectrum of spatial needs from its turnkey Software-as-a-Service applications for Real Estate and Local Government, to its mapping development platform and decision ready location data for organizations building and extending their own applications.

"At Digital Map Products, our vision is to advance spatial technology and at the same time to make it more accessible to organizations and consumers," says Jim Skurzynski. "There's a transformation underway in the GIS industry, and it's exciting to see the new breed of location technologies powered by cloud services bringing consumer and business applications to the next level."
