

Digital Map Products to Discuss the Cloud GIS Revolution at GITA's Geospatial Solutions Conference

(Irvine, CA – April 6, 2011) Digital Map Products (DMP) is excited to announce its involvement at the Geospatial Information & Technology Association's (GITA) upcoming Geospatial Solutions Conference in Grapevine, TX. This industry leading conference, which brings together a cross-section of senior professionals from a wide variety of organizations that employ geospatial technology to solve problems and provide essential services, will take place April 10-13th.

Digital Map Products, a leading innovator of cloud-based spatial solutions for business, government and consumers, will be hosting a Solutions Spotlight at the conference on Monday, April 11th from 11:10 – 11:40 am. The session, titled “The Cloud Revolution: Leveraging Cloud Computing for GIS Success”, will discuss recent developments in Cloud GIS, discuss how cloud computing changes the rules for developing, deploying and maintaining GIS, and provide tips for how organizations can succeed with GIS in the cloud.

Drawing on its more than a decade of experience delivering cloud-based GIS applications and geospatial data, Digital Map Products will highlight Cloud GIS best practices, customer case studies and product examples in its talk. Both technical and non-technical audiences looking to enhance their knowledge of Cloud GIS will benefit from this educational session.

In addition, conference attendees can visit Digital Map Products at booth #507 where the company representatives will be hosting live demos and answering questions about their Solutions Spotlight presentation, DMP's products and the company's cutting edge approach to geospatial technology. Digital Map Products' mission is to mainstream GIS by making it easier to implement and use.
